

Interview Card

Digital Music

Music as a medium has evolved from analog records to compact discs. And today, many people buy music in digital form from Internet stores. They download the songs they have selected and enjoy them by playing them with computer software or copying them onto a portable player. In the meantime, CD sales have been decreasing recently, and many CD stores have gone out of business.

Your story should begin with this sentence: **One day, Yuriko and her grandmother were talking about their favorite music in the living room.**
