Environmentally Friendly Buildings

Today in Japan, environmentally friendly buildings are attracting more attention. This is because serious concerns are being expressed about the amount of energy people use. Environmentally friendly buildings reduce this amount, so they help improve the environment. More and more homes, schools, and offices are being designed in this way. Such buildings will play a more important role in the future.

Your story should begin with this sentence: **One day, Ken was listening to his teacher, Mrs. Ito, talk about air conditioning.**
